REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art, Nagahara et al (US 5,816,900 and US 5,931,719) do not teach or suggest adding a controller programmed to control pressure to ensure bowing the pad while relatively moving the conductive face of the wafer and the pad into contact. Nagahara et al '900 teaches bringing the pad and wafer into contact first, and then applying pressure to bow the pad. Thus, the prior art fails to suggest the claimed process programmed into the controller. Further, the order claimed by Applicant produced an unexpected result over the order disclosed by Nagahara et al, namely, the removal of bubbles from the wafer surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
